

The **GO2 by Sure-Lok*** is an adaptable O2 holder designed to safely and quickly transport medical oxygen for personal use in school bus, paratransit, community transport, ambulance or non-emergency transportation vehicles.

- **GO2** prevents O2 cylinders from tipping, falling or becoming a projectile during a sudden stop or maneuver.
- **GO2** works with Series L Track for quick fleet-wide deployment and ideal vehicle and passenger placement.

SPECIFICATIONS:

- O2 Cylinder Holder meets National School Transportation Specifications & Procedures, Support Equipment and Accessories, B.3 and IEP – IFSP Process, Guidelines, E.11.
- O2 Cylinder Holder meets Ambulance Manufacturers Division AMD Standard 003, Oxygen Tank Retention System
- Approved to the requirements of CEN standard - BS EN 1789:2007, Medical vehicles and their equipment.
